SPARKLING SAKE- HAPPO 発泡酒

Sparkling sake is made with the same process as classic sake up to a point. Fermentation is halted earlier than usual, when the alcohol is only around 5 to 10 percent, as opposed to the 18 to 20 percent of normal sake. At this time, there is still plenty of sugar in the mash. In the bottle, a secondary fermentation takes place that produces carbonation.

NIGORIZAKE CLASSIC 濁り酒

Known as cloudy sake, it is passed through a loose mesh to separate it from the mash. It is not filtered thereafter, resulting in rice sediment in the bottle. It can be found in sparkling varieties, as well.
