SAKE & SHOCHU BY THE GLASS

For thousands of years, rice has been Japan's most important agricultural product. Once a form of currency in Japan, rice is now used to produce many goods, such as flour, vinegar, mochi, and of course, sake. Each type of sake rice will behave a bit differently during the brewing process, this combined with the water of the region will have an amazing impact on the flavor of the sake.

JAPANESE WHISKY

Our Japanese Whisky list is a vast and finely curated selection for both an experienced and novice audience. This selection is largely attributed to the three Founding Fathers: Kiichiro Iwai of Mars, Masataka Taketsuru of Nikka and Shinjiro Torii of Suntory and the new generation of whisky: Ichiro and Akashi distilleries.

MARS

Located between Japan's Southern and Central Alps, Mars Shinshu is the highest whisky distillery at just over 2,600 feet. This site was chosen for its cooler temperatures which slowed down the evolution, resulting in the taste of an elegant, smooth and complex whisky.

NIKKA

In 1934, Masataka Taketsuru built Japan's northernmost distillery, Yoichi; located on the island of Hokkaido. Still to this day, the whisky is crafted in the traditional manner using the last remaining malt stills heated by coal, a rare practice that is no longer used in Scotland, producing a rich, peaty and masculine malt.

In response to Taketsuru's success he opened Miyagikyo distillery, his second distillery in 1969, on the island of Honshu in the foothills of the Miyagi prefecture. This distillery is surrounded by mountains and two fresh water rivers, providing both supreme air quality and humidity conditions resulting in a soft, mild malt.

SUNTORY

Established in 1923 by Shinjiro Torii, the Yamazaki distillery located in Kyoto, is the birthplace of Japanese whisky. This site was chosen because the climate and terrain is completely different to Scotland's, thereby forming unique conditions for maturing whisky.

In 1973, Torii's son Keizo Saji, founded the Hakushu distillery deep in the forest of Mt. Kaikomagatake in Japan's Southern Alps. It's lush environment and high altitude is what separates the distillery from the others. With multiple distilleries and diversity in whisky making, Suntory produces over 100 malt and grain whiskies.

AKASHI

The Eigashima distillery was founded in 1888 in Akashi city near Kobe, Japan. This distillery received a license to produce in 1919 but only began using it for whisky production in 1984, when they relocated to the new White Oak facilities. Prior to this time, it was mainly and is still used for making sake and shochu. Whisky production usually takes about two months and is distilled through Eigashima's traditional pot stills and set to age in ex-bourbon and ex-sherry casks.

ICHIROS

Chichibu distillery is Japan's newest distillery founded in 2008 by Ichiro Akuto. Shortly after working for the Suntory distillery, he decided to follow in his grandfathers footsteps and build and operate a distillery in the village Chichibu. Located about two hours from Tokyo, the distillery experiences hot and steamy summers and cold and dry winters. The contrast in weather greatly affects the whisky by making the maturation fairly short resulting in a fruity and well-balanced taste.
